Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-11 are rejected under 35 U.S.C. 103(a) as being unpatentable over Foley in view of Marotta.

There is disclosed in Foley a beverage making apparatus, comprising: a heated water tank 15, 34; a heating element (fig. 2) operatively associated with the heated water tank for heating water therein; the heated water tank defining an inlet aperture 42 therein for receiving water to be disposed in the heated water tank; a fill tube 2, communicating with the inlet aperture for receiving water there through and providing water to the heated water tank; a fitting 44, 43, for attachment to the heated water tank and the insulating tube, the fitting including barbs (threads) 43 for connecting the tube thereto; and a gasket 56 for use with the fitting for sealing the fitting.

Marotta discloses that it is known in the art to have a fill tube 30, 65 formed of an insulating material, the tube being connected to a hot water tank by a fitting 26, 90 also formed of an insulated material; wherein the insulating material acts as a thermal insulator.

It would have been obvious to one skilled in the art to substitute the fill tube and fitting of Foley with those disclosed in Marotta, in order to thermally insulate the fill tube from the hot water tank.

Response to Arguments

Applicant's arguments with respect to claims have been considered but are moot in view of the new ground(s) of rejection.

The Foley reference discloses a fill tube which provides water to a heated water tank. This tube being modified by the teachings in Marotta to be insulated. Thus, reducing the likely hood that cold water flowing through the tube into the hot water tank lower end, will reduce the temperature of the hot water in the tank at the upper end.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
